PCI DSS Compliance Services

PCI DSS (Payment Card Industry Data Security Standard) Compliance is all over the news these days, most often due to the lack of PCI Compliance by an organization and a resulting data breach with millions of credit and debit cards being stolen. All businesses that store, process, or transmit payment cardholder information (as well as third-party service providers) are required to protect cardholder data and demonstrate PCI Compliance. A failure to do so may result in steep penalties, loss of brand reputation, and even losing the ability to accept credit cards as a form of payment.

PCI Compliance is a complex and extensive process that can overwhelm staff. Compass IT Compliance works with businesses of different sizes and from a variety of industries to ensure compliance through the following services:

PCI Risk Assessments

Identify threats and vulnerabilities that could negatively impact security of payment card data

PCI Report on Compliance (ROC)

Formal QSA audit testing the effectiveness of the security controls in place to protect cardholder data

PCI Continuous Support Services

Managing recurring PCI DSS requirements to help achieve and maintain PCI DSS compliance

PCI Training

Online and on-site training programs to teach staff the requirements and updates to PCI DSS

ASV Scanning Services

Conduct vulnerability scanning to validate adherence with PCI DSS scanning requirements

Why Choose Compass IT Compliance?

Our QSA-certified (Qualified Security Assessor) auditors are experts at evaluating how an organization processes, transmits, and stores card holder data and makes best-practice recommendations to help ensure compliance with the most current version of the PCI Data Security Standards. Founded in 2010, we were one of the first organizations to become a certified PCI DSS Qualified Security Assessor. Our team is made up of senior assessors with experience assisting organizations of all sizes from all industries. Not only are they experts in PCI DSS, but they also carry decades of experience working with other personally identifiable information regulations and frameworks, such as HIPAA, GDPR, NIST, and so on.

Compass IT Compliance has the knowledge, tools, and experience to tailor the right approach for your business to achieve compliance with all 12 PCI DSS requirements. Each completed PCI Report on Compliance also includes a digital and framed certificate of compliance to display for clients, staff, and stakeholders.

"Compass was instrumental in working closely with our staff to inform about PCI compliance and credit card handling…"

About Compass IT Compliance

Founded in 2010, Compass IT Compliance is a nationwide leader in providing IT security, audit, and compliance services to organizations of all sizes in all industries. Our goal is to partner with your organization to help you mitigate your overall information security risk while providing you with the best customer service possible. Unlike some of our big-name competitors, our Security Specialists and Account Managers carry smaller workloads so that they may dedicate a more thorough and personal approach to each engagement. We work with you and your team to provide detailed, actionable results that mitigate your overall information security risk. Learn more at Compassitc.com.
